

## International Animal Health Products Product Information Series

# Protexin®

## MULTI-STRAIN PROBIOTIC

Protexin now comes in a handy 100g paste syringe for use with a dose sensitive adjustable gun.

100g is sufficient to treat 10 horses at maintenance levels, 25 cattle at stress levels or for a maintenance dose to treat more than 30 cats or dogs.

**Convenient and easy-to-use, the paste provides 180 million CFU/gram, equivalent in concentration to Protexin Liquid and Soluble!**

PROTEXIN® is a blend of live viable microbes which benefits the host animal by improving the intestinal microbial balance. Everyday use of PROTEXIN helps maintain a balanced digestive system, optimising digestion of feed and enhancing your animals' health, naturally. These microbes are safe, non-toxic and residue free.

- Aids during periods of intestinal dysfunction in all animals including treatment and control of scouring or diarrhoea, exclusion and suppression of pathogens such as *E.coli*, *Salmonella* spp. and *Aeromonas* spp.
- For post-antibiotic therapy for all animal and re-establishment of gut microflora following antibiotic usage.
- Improves weight gains and feed conversion in growing pigs and cattle.
- Productivity improvements and reduced mortality in poultry.
- Aids in the establishment of gastrointestinal microflora of physiologically immature animals e.g. day old chicks, neonatal calves, pigs, foals, lambs and kids, puppies and kittens.

PROTEXIN® may be used during periods of stress (stress disrupts the normal intestinal balance), eg. overcrowding, pregnancy and lactation, scouring and diarrhoea, temperature extremes, transportation, training and exercise and medication; and following animal husbandry procedures or practices such as antibiotic use, birth, castration, debeaking/dehorning, diet changes, loss of appetite, surgery, vaccination, weaning and worming. PROTEXIN is compatible with feed ingredients including anthelmintics, coccidiostats, minerals and vitamins and some antibiotics.

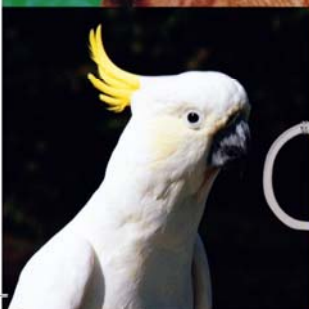

POWDER: 125 g, 250 g, 1 kg, 5 kg, 10 kg, 25 kg. LIQUID: 125 mL, 250 mL, 1 L, 5 L, 25 L.

SOLUBLE: 2g (sachets); 50's, SOLUBLE: 125 g, 250 g, 500 g, 2.5 kg, 5 kg, 25 kg.

PASTE: 30 g, 100 g (syringe).
