

# INFORMATION SHEET

# Cyguard™ Spray-on

## FOR SHEEP

### CONTROL AND TREATMENT

A ready-to-use spray-on sheep dip containing cyromazine for the preventative control of blowfly strike on sheep and lambs. CYGUARD™ SPRAY-ON is an ideal product to use on lambs at docking/tailing or other stock where ease of use is important and only short to medium term protection is required. CYGUARD™ SPRAY-ON is an easy to use spray-on, which will give up to 6 weeks residual protection against fly-strike caused by all the commonly found strike flies including the Australian blowfly (*Lucilia cuprina*).

### BENEFITS

- Insect growth regulator
- Protects against all the commonly found strike flies
- Can be used on all breeds of sheep
- Ideal for lambs at docking
- Controls organophosphate resistant strains
- No known resistance
- Red indicator dye (temporary)
- Easy to apply

### DOSE RATE

	2 bands		3 bands		4 bands		
	sheep between 11-20kg		sheep between 11-40kg		sheep between 11-60kg		
Liveweight kg	11-15	16-20	21-30	31-40	41-50	51-60	61-70
No. of bands	2	2	3	3	4	4	5
Volume per band (ml)	7.5	10	10	13.3	12.5	15	14
Total vol applied (ml)	15	20	30	40	50	60	70
Sheep treated per 10L	666	500	333	250	200	166	142

### WITHHOLDING PERIODS

It is an offence for users of the product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

Milk: Milk intended for human consumption or manufacture for human consumption must be discarded during treatment and for 35 days following the last treatment.

Meat: Sheep producing meat or offal for human consumption must not be sold for slaughter either during treatment or within 21 days of cessation of the last treatment.

Active Ingredient 60g/L Cyromazine in the form of an aqueous concentrate. Registered pursuant to the ACVM Act 1997 No. A01136.
