

METABOLIC COMPARISON CHART

AHD METABOLICS

Metaboost CBG 40%
(A011060)

Metaboost 4in1[®]
(A011061)

ALTERNATE PRODUCTS

(claims will differ from AHD metabolics)

C.B.G 37.5

Glucalmax

Glucalmag

Glucalphos

Key facts:

- AHD metabolics are manufactured by a validated terminal sterilisation process – giving greater assurance of sterility and quality.
- AHD 4in1 contains 47g/L magnesium hypophosphite backed by the manufacturers to be effective as a treatment for grass staggers.
- It is recommended that Calci Blue be administered after the 4in1 pillow to give the cow 922mg/L more magnesium plus provide an extra 24 hours supply of calcium. This will help prevent any relapse.
- To reduce the risk of milk fever use CalciTop Bolus.
- AHD CBG contains 400g/L calcium borogluconate (40%).
