

# AHD LTD PARALOCK™

## COMBINATION SHEEP + TAPE ORAL

Double active plus tape oral drench for sheep.

*The first drench for new season lambs.*

## NEW PRODUCT RELEASE

## PRODUCT USAGE

For the treatment and control in sheep of all major gastrointestinal parasites, including those with resistance to the benzimidazole or levamisole/morantel families.

Also treats and controls lungworms and tapeworms, and is an aid in the control of adult fluke.

Provides supplemental source of levamisole, albendazole, praziquantel, copper, **selenium**, zinc, cobalt and iodine.

Refer to label for complete information and full chart of dose rates.

Paralock™ drenches are presented in the AHD Ltd distinctive olive-green containers complete with drum tap located behind the back label.

## PRODUCT BENEFITS

-  Reduced meat withholding period of 14 days.  
Milk 35 days.
-  Reduces the output of viable worm and fluke egg.
-  Cleans out tape worm within hours.

## PARALOCK INDICATIONS:

**Sheep:** For use against benzimidazole and levamisole sensitive internal parasites of the following species:

- Small brown stomach worm (*Teladorsagia circumcincta*)
- Barber's Pole worm (*Haemonchus contortus*)
- Stomach hair worm (*Trichostrongylus axei*)
- Black scour worm (*Trichostrongylus colubriformis*)
- Small intestine worm (*Cooperia curticei*)
- Whipworm (*Trichuris ovis*)
- Large-mouthed bowel worm (*Chabertia ovina*)
- Nodule worm (*Oesophagostomum venulosum*)
- Threadworm (*Strongyloides papillosus*)
- Thread necked intestinal worm (*Nematodirus filicollis*, *Nematodirus spathiger*)
- Hookworm (*Bunostomum trigonocephalum*).

Also effective against:

- LUNGWORMS: Large lungworm (*Dictyocaulus filarial*).
- TAPEWORMS: Heads and Segments (*Moniezia* spp.).
- AS AN AID IN CONTROL OF LIVER FLUKE (Adults): *Fasciola hepatica*.
- OVICIDAL: Reduces the output of viable worm and fluke eggs.

### Anthelmintic resistant strains:

Resistance can develop to any anthelmintic. Ask your local veterinary practitioner or animal health adviser for recommended parasite management practices for your local area to reduce the potential for resistance to develop. It is advisable that a resistance test be conducted regularly when using any parasite treatment.

## DOSE RATES:

1mL per 5kg bodyweight equivalent to levamisole hydrochloride 8mg, albendazole 5mg, praziquantel 3.8mg, selenium 0.1mg, copper 0.42mg, cobalt 0.04mg, zinc 0.12mg and iodine 0.15mg per kg bodyweight.

| Bodyweight | Dose  | 10L treats (head) |
|------------|-------|-------------------|
| 15 kg      | 3 mL  | 3333              |
| 16-20 kg   | 4 mL  | 2500              |
| 21-25 kg   | 5 mL  | 2000              |
| 26-30 kg   | 6 mL  | 1666              |
| 31-35 kg   | 7 mL  | 1428              |
| 36-40 kg   | 8 mL  | 1250              |
| 41-45 kg   | 9 mL  | 1111              |
| 46-50 kg   | 10 mL | 1000              |
| 51-55 kg   | 11 mL | 909               |
| 56-60 kg   | 12 mL | 833               |
| 61-65 kg   | 13 mL | 769               |
| 66-70 kg   | 14 mL | 714               |
| 71-75 kg   | 15 mL | 666               |

Over 75 kg add 1mL for every 5kg body weight.

Drum tap located behind back label.

## ACTIVE INGREDIENTS

|                          |          |
|--------------------------|----------|
| Levamisole Hydrochloride | 40 g/L   |
| Albendazole              | 25 g/L   |
