

I am SO impressed with this product!!

I have struggled since late autumn with this mare having Fecal Water Syndrome, and none of my usual remedies have worked this year. It was helped a bit (changed from explosive diarrhea to just cow pats) by switching her to Lucerne Pellets instead of chaff, but her feed was still going straight through her despite being taken off the grass.

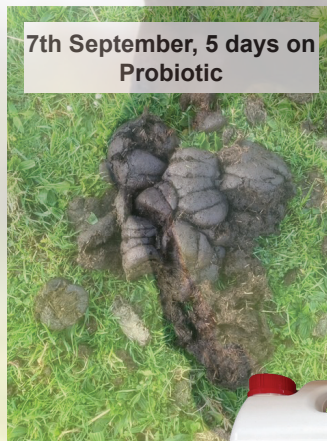

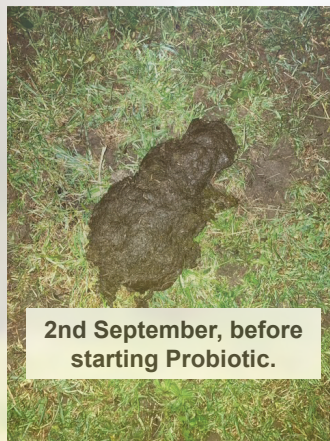

I have now run out of the bottle you sent me, but I will most definitely order more! I'm hoping she doesn't go backwards between now and when the new bottle arrives...

She is finally starting to gain weight again, and I can relax now because I honestly thought I might be at the point where she would have to be pts due to the weight loss and that I just could not get her digestive system to slow down.

Thank you very, very much for the sample, it's been an absolute game changer for her.

Steph
