

# NEW

## Redact

Redact is a new product for direct application on animals as a treatment for flies, lice and ticks.

For the control of flies on cattle and horses, lice and ticks on cattle, and ants, cockroaches, fleas, flies, mosquitoes, spiders in domestic, industrial and public health areas.

### ACTIVE INGREDIENT

Contains 200g/litre cypermethrin in the form of an emulsion

### APPLICATION

Redact may be applied through spray races or by hand spraying. Redact has been approved for use on lactating dairy animals, but care should be taken to avoid direct contamination of milk with the product. DO NOT mix and apply with teat sprays during milking. DO NOT apply to lactating dairy animals after they have been milked. DO NOT spray onto the teats of lactating cows.

The photos below show the impact flies can have on calves/cows and then the same calf after application.

Redact Features and Benefits
200g/ltr Cypermethrin
WC Formulation = Oil Emulsion dispersed in water – Contains no petroleum solvents
WC liquids have 40% less drift than EC formulations
