

AHD TRIPLE CLEAN CONCENTRATE DISINFECTANT

FOR ANIMAL HOUSING

PRODUCT INFORMATION

- Available in 5L and 20L containers with a low dilution rate of 10mls per 1 litre (1 litre makes 400 litres of final wash). The mixed solution has an obvious colour and smell.
- Non-corrosive, biodegradable posing little risk to the environment, safe on animals and humans.
- Active is a double quaternary ammonium blend.
- High hard water tolerance levels with broad-spectrum action against both gram negative and gram positive organisms (effective in hard or soft water supplies).
- Can be mixed in cold or warm water.
- Effective in the presence of organic matter
- Controls micro-organisms that cause odours
- Remains stable for long periods when mixed in cold or warm water*.
- Triple-Clean concentrate is an extremely cost effective proven disinfectant formulation for use in veterinary, animal housing, animal welfare and the cleaning of all equipment.

* Stability applies only to product that has not been contaminated, left in direct sunlight or mixed with other ingredients. Must be used as per label instructions.

Liquid concentrate virucidal, bactericidal and fungicidal disinfectant, sanitizer and cleaner.
