

UNLOCK™

“Unlocking the solution to your sheep flock fly and lice control program”

Unlock Pour-on

Features

A unique water-based combination Pour-on for the control of lice and flystrike on sheep and flystrike prevention on lambs at tailing/docking.

Contains 20g/L diflubenzuron and 10g/L deltamethrin. The only Pour-on available with this combination of actives.

Benefits

Easy to use Pour-on for up to 14 weeks prevention of fly strike and 5 months lice control on all breeds. Suitable for use at tailing/docking for fly prevention through to weaning and beyond.

Rapid knockdown combined with a prolonged period of control activity. Deters flies from landing and laying eggs.

Applied via the AHD T- Bar easy squeeze applicator.

Withholding: Meat 7 days. Wool at least 60 days. Milk for human consumption 35 days.

Available in a 20 litre and 5 litre Back Pack.

See next pages for 5L and 20 Litre dose rates.

Dose rates for 5L Unlock Pour-on

UNLOCK™ POUR ON | Read label carefully and obtain special instructions before use. Do not handle until all safety precautions have been read and understood.

HANDLING PRECAUTIONS

May be harmful if swallowed, inhaled or absorbed through the skin. Wash hands and exposed skin before meals and after use. Do not inhale vapour. May cause mild skin irritation. Avoid contact with skin and eyes; wear protective clothing as synthetic pyrethroids can irritate some individuals. May cause eye irritation. Avoid contact with eyes. Exercise caution around children. Do not use on animals severely stressed or in ill health. Do not use when mycotic dermatitis is present. **NOT FOR ORAL USE.** Deltamethrin may possibly affect the nervous system. Handle with care. The contents of this container must not be used for any purpose other than that for which it is intended. Wear protective clothing. Do not smoke, eat or drink while using. Wash thoroughly before meals and after work.

FIRST AID

If swallowed do NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If splashed in eyes wash out immediately with water. If inhaled, move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped.

ENVIRONMENTAL PROTECTION

Very toxic to aquatic organisms and terrestrial invertebrates. Harmful to the soil environment and to terrestrial vertebrates. Avoid contamination of any water supply with product or empty container. Avoid release into the environment.

DISPOSAL

Triple rinse empty container and dispose of rinsate in a suitable landfill. Crush or puncture and bury in a suitable landfill, or if appropriate recycle.

EMERGENCY RESPONSE

In case of spillage wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely.

UNLOCK™ POUR ON is a backline synthetic pyrethroid/insect growth regulator treatment for the control of lice, and for up to 14 weeks prevention of flystrike, on sheep. Lice control is achieved in 3-4 weeks after application. For lice control UNLOCK™ POUR ON can be applied to fine wool and coarse wool breeds with up to six weeks wool growth. For optimum results treatment is recommended when wool is as short as possible. The scourable dye may still be visible at shearing if product is applied on to sheep more than six weeks after they were shorn or if they were shorn before the recommended wool withhold of 60 days. Existing flystrike at the time of application must be treated with a conventional blowfly dressing. UNLOCK™ POUR ON is not recommended for this purpose.

DIRECTIONS FOR USE

By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

SHAKE WELL. No mixing is required. Weigh at least the heaviest animal in the mob to ascertain the correct dose to administer. It is recommended to use the UNLOCK™ POUR ON applicator with a T-Bar nozzle which enables rapid dispersion of UNLOCK™ POUR ON. Do not use UNLOCK™ POUR ON if rainfall is pending. Clean equipment thoroughly after use with water. The breach and backline diagrams referred to beside the dose rate table.

- FLYSTRIKE PREVENTION AT DOCKING: Apply 11ml per lamb as an arc (as per the breach diagram).
- FLYSTRIKE PREVENTION AND LICE CONTROL: Apply the recommended dosage as 2 stripes (as per the backline diagram) plus a third stripe as an arc (as per the breach diagram).
- LICE CONTROL ONLY: Apply the recommended dosage as 2 stripes (as per the backline diagram), eg 31-40kg live-weight = a total of 27ml along the backline from poll to tail.
