VIRUKILL

LIQUID DISINFECTANT

The right choice in disinfection

Virukill represents a revolutionary approach to animal hygiene that has advanced the art of disinfection into a new era.

Suitable for all animal hygiene including housing plus has Mycoplasma Bovis claim

Contains a novel and patented quaternary ammonium compound synthesis

Excellent biodegradability and hence low environmental impact

Truly non-corrosive and does not oxidise

Non-toxic at recommend rates

The concentrate has a very low toxicity, LD 50 > 4000MG/KG, less than table salt. Safe for use by pregnant women.

High surfactant content with excellent wetting and penetrating abilities

Highly active in the presence of organic matter, including hard water and heavy soiling - ideal for cleaning vehicles, farm bikes and equipment and use in foot baths.

Not pH - dependant and works at a wide range of temperatures

Remains stable for 3 months once mixed (if not contaminated)

New Zealand owned and operated

Manufactured for and distributed by AHD Ltd
1229 Maraekakaho Road Hastings
Phone: 06 873 3611. email: sales@ahdltd.co.nz

VIRUKILL

Disinfectant

Virukill and Mycoplasma bovis

Ongoing risks from Mycoplasma bovis are going to have a big effect on the New Zealand dairy industry.

If the disease is not eradicated (deemed unlikely) then every dairy farmer will have to implement new on-farm management strategies to minimise effects.

A focus on "good hygiene" procedures particularly for calf rearing will have to be adapted and should be normal "good practice".

Eradication of pathogens in the animal quarters before animal occupation.

Exclusion of pathogens once the animals occupy their quarters.

Suppression of the pathogens which evade the attempts to eradicate and exclude.

Virukill, distributed by AHD Ltd has been tested against Mycoplasma SPP (covers all species).

Result

Virukill was highly effective against Mycoplasma spp at 0.5% and 1% dilution with a 20 minutes contact time.

Virukill is MPI approved valid until 2020.

Available in 1lt, 5lt 20lt and 200lt pack sizes. Ask for VIRUKILL disinfectant at your local rural merchandise or veterinary outlet.

Dosage:

Virukill is a liquid formulation (no messy powder to deal with) applied at the recommended rate of 1:100 (1 litre of Virukill per 100 litres of water) and typically costs up to 20% less per mixed litre than other disinfectants in its performance category. Proven and trusted with trial data support.
